## Look a little closer

Gaudí's basilica makes structure part of its story. Outside, the Nativity and Passion façades give the same sacred subject very different forms. Inside, branching columns and colored windows change the experience of scale. This remains a place of worship as well as an architectural visit; choose the areas included in your reservation.

## Something to notice

Compare a branching column with a tree outside. Notice how light changes the stone.

## A little consideration

Follow visitor and photography rules, leave objects and historic surfaces untouched, and give other people room.
