Look a little closer

Cerro Catedral combines a mountain-base village with lift-served views of the Andes and nearby lakes. Skiing belongs to the winter season; pedestrian sightseeing has its own operating calendar and must be planned around weather and the operator's available lifts.

Something to notice

The 2026 ski season ended on 12 October; consult current pedestrian operations rather than assuming ski access.

A little consideration

Stay in areas opened by staff and follow lift, weather and mountain-safety instructions.
