Look a little closer

At the meeting of Corrientes and Avenida 9 de Julio, the Obelisco is a gathering point and a defining Buenos Aires landmark. Alberto Prebisch designed the monument, inaugurated in 1936 to mark 400 years since the city's first foundation. Take in its slender silhouette from the surrounding public sidewalks.

Something to notice

Find a safe place to pause. Notice how the white monument changes against the sky and how the avenues frame it. Sketch one line of the skyline.

A little consideration

Use marked crossings and keep moving on busy sidewalks. Avoid the roadway and respect temporary barriers and public gatherings.
