## Look a little closer

Within Parque Tres de Febrero, the Rosedal pairs formal rose beds with lakeside paths, a white Greek bridge and a garden of poets. Benito Carrasco completed the landscape in 1914. Come for the garden's shape and quiet corners as much as for the flowers: blooms change with the season.

### Something to notice

Follow the paths between the beds. Notice the difference between a rose seen close up and the garden's larger geometry. Find a place to sit and let the pace slow.

### A little consideration

Stay on the paths, do not pick flowers and respect garden gates. Check official notices after rain or strong winds; closures protect visitors and the landscape.
