Look a little closer

Belém Tower gives the Tagus waterfront a distinctive stone silhouette. This guide focuses on the public exterior approach and the relationship between the fortified tower, its bastion and the river. Restoration, tides and managed access can change the immediate setting. An exterior visit does not include or promise admission to the tower.

Something to notice

Compare the low bastion with the vertical tower. Notice the tide and the waterline.

A little consideration

Stay on permitted public paths, leave entrances clear and respect residents, workers and other visitors.
