Facts checked 2026-10-12

Look a little closer

Brooklyn Bridge joins Manhattan and Brooklyn across the East River. Its stone arches and web of suspension cables turn an everyday crossing into a memorable walk. Look both along the deck and outward toward the waterfront, leaving room for the many people using the same path.

Something to notice

Pause safely beside the path. Notice how the cables frame the sky and how the two shores differ.

A little consideration

Stay in permitted public areas, keep entrances clear and respect people using the building for everyday work.

YOUR DAY
